

Report on the Internet+ Training for Persons with Disabilities

Special remarks:

About the Venue: Since our previous partner Hainan Province Disabled Persons' Federation would host another big international conference in December, it was unable to co-organize this training workshop. So we **changed Guangzhou city as the host city** for the city has a comfortable climate in winter and Guangzhou DPF was willing to co-host the workshop with us. Another big reason attracting us to change host city is the price level in Guangzhou is lower than that of the tourist city Haikou, so the **budget of this training workshop was greatly reduced.**

About the number of participants: We planned to recruit 20 persons with or without disabilities to the workshop. But the applicants are beyond what we expected. Since changing host city reduced the hotel and means cost so we expand the number of participants to 56, including 20 from Guangzhou city. 27 participants from Brunei, Chile, Hong Kong, China, Indonesia, Papua New Guinea, Russia, Thailand, Bangladesh, Malaysia, Nepal, The Philippines and Vietnam are financially supported by RI grant. Other 29 participants are self-funded.

About the per diem: Due to the number of participants exceed we planned we did not give the per diem to the participants. You will not see the expenditure in the financial report.

About the cost: Guangzhou city is not a hot tourist city like Haikou city, so the price level is lower. Another reason we can reduce the budget is support from Guangzhou Disabled Persons' Federation. The training workshop was held in a training center affiliated with Guangzhou Disabled Persons' Federation so the rent of venue is much lower. **The total cost of the workshop is 50,400.36USD.** The detailed cost is showed in the following table.

The following is the project summary report, including the financial report.

The Internet+ Training for Persons with Disabilities, a RI-funded project proposed by Fuhong Society of Macau, was successfully held in 17~21 December in Guangzhou, China.

About 60 participants from 13 countries and districts joined the training. The participants learned about knowledge and experience on Internet+ assistive devices fitting, management of e-commercial businesses, community marketing, etc.

Besides lectures and discussions, they visited the CanYou Group headquartered in Shenzhen, an enterprise with over 90% of its staff having disability, and one of its subsidiaries— Miracle Film Technology Co.

Despite the busy schedule, they still managed to take a glimpse of the accessibility level of Guangzhou downtown and disability-themed cultural event.

It is our greatest pleasure to see that the participants found the training useful for them to catch up with the digital trend and explore Internet-related employment opportunities. We are encouraged by their positive feedback:

“Your concern to help people with disabilities to learn and remember that they deserve to know new skills and knowledge and have the opportunities to improve their lives is a treasure that I would always remember and share as an example that with professionalism, organization and a lot of patience and good intentions.”

“Honestly, I see that it is very useful for me. It helps me to have more knowledge about E-commerce. Moreover, I have also learnt about the way we start up online business, which is very necessary for people with disabilities.”

And their excellent suggestions, such as:

“Each trainee can have 10 minutes to share about their e-commercial situation.”

“Every year organize the event of different innovative title.”
